Why making it with Patons makes it really worthwhile . . .

Every year Patons makes up thousands and thousands of garments to ensure that each individual pattern is perfected in every size stated and **every Patons yarn specified**—of vital importance to the shape of your finished garment.

And once in shape—always in shape. No shrinking. No stretching. Patons promise it. With over 180 years of experience to draw on, the people at Patons don't pay lip service to quality, they work at it constantly. That's why making it with Patons makes it really worthwhile.

**FEATHERSOFT BABY NYLON
3 PLY**

A fine, light yarn
that's easy to wash, quick to dry,
non-shrink, mothproof and
incredibly long-wearing.

No. 1—Crocheted Dress (opposite)

CAUTION!

This garment has been designed exclusively for the Patons yarns specified; therefore we can take no responsibility if other yarns are used.

WASHING INSTRUCTIONS

BEFORE WASHING—Make any needed repairs. Remove any unwashable buttons or trimmings, close zip and turn garment inside out.

WASHING—Do not pre-soak as is recommended with some detergents containing enzymes. Washing powders approved by the Australian Wool Corporation should be used for woollen garments. A mild detergent should be used for cotton or synthetic garments. Powder should be fully dissolved in warm (not hot) water before immersing the garment. Squeeze the garment gently in the suds; do not rub. A heavy soil mark can be treated before washing the whole garment by damping the area and pressing in some powder with your fingers.

RINSING—Rinse garment thoroughly with warm (not cold) water, until the water is clear. Support your garment with both hands whenever you lift it, to prevent stretching.

DRYING—After the last rinse, spin dry the garment or squeeze it between towels to remove excess water. Dry naturally on a flat surface out of direct sunlight. **Never hang a hand-knitted garment.** When drying colour-contrast knitteds, do not leave contrasting areas in contact with each other in the wet or damp state.

PRESSING—Never press synthetics. Generally, woollen or cotton garments should be pressed with a warm iron and a slightly damp cloth.

SOME IMPORTANT INFORMATION

Variations in specified yarn quantities for garments.

Knitters occasionally comment that the quantity of yarn recommended for a garment varies from the amount they actually use. One major reason for this is that no two people knit or crochet in exactly the same way.

When we specify a quantity of yarn for a particular garment, we are stating a figure that is the end result of having each individual design made by as many as six different knitters. The average quantity determined by this check knitting is regarded as the most satisfactory figure for that particular garment, knitted at the **correct tension*** to the measurements specified and in the actual yarn recommended. Naturally, if you decide to change the body or sleeve length you must allow for an adjustment to the quantity of yarn.

* **Correct tension**—see tension instructions illustrated in this book.

KNITTING TENSION TEST

Take the needles and yarn specified in the instructions, cast on 20 stitches and knit a square in stocking stitch. Check the tension **very accurately** by placing an inch tape or rule along the stitches—marking the inch (or inches) with pins and counting the number of stitches to the inch or inches. If you get too many stitches to the inch your tension is too firm—try a size larger needle. If you get too few stitches to the inch your tension is too loose—try a size smaller needle.

CROCHET TENSION TEST

Before you start your garment, take the yarn and hook specified in the instructions and make a chain 4 to 5 inches (10 to 13 cm) long. Work 1 square in whatever stitch is mentioned in the Tension paragraph of your instructions. With pins, mark out the number of stitches (or patterns) and rows quoted in the Tension. With an inch tape, measure the distance between the pins and compare with the tension given in the instructions. If your tension is too loose (i.e. if the piece measures more than the measurement given), try a size finer hook, if your tension is too tight (i.e. if the piece measures less than the measurement given), try a size larger hook. If more than one size of hook is recommended in the instructions and you have altered your hook to correct the tension, corresponding alterations must be made to hooks throughout the instructions.

Pressing Crochet—It is not necessary to press most crochet stitches, as pressing tends to flatten the appearance of the stitch. However, if pressing should be necessary, this should be done very carefully, from the wrong side of the work. Use a damp cloth and warm iron, and do not let the full weight of the iron fall on the garment—steam, rather than press. **Synthetic yarns should not be pressed at all.**

IMPORTANT — DYE LOTS!

Always buy enough of the same dye lot at the one time for a complete garment, as a variation between dye lots can occur.

Retain ball bands until the garment is completely knitted, and, in the event of an enquiry concerning the purchase, submit all ball bands.
